

## Achieve Energetic Balance within the Mind-Body Complex

The Intention Disc and Sodalite Window Pendant work together to assist in the bringing energetic balance to the mind-body complex.

Stress and the outside influences of everyday life can wreak havoc on our internal systems and our emotional wellbeing. When we experience stress from external influences our internal systems are affected and we become prey to health concerns and emotional distress.

Using the Intention Stone along with the Sodalite Window Pendant you can use the benefits of ZeroPoint Energy to bring balance and a state of emotional and physical wellbeing back into your life. You will feel your mind-body complex working together to support a state of natural wellness.

While lying down or seated hold the Sodalite Window Pendant in one hand and the Intention Stone in the other. Close your eyes and remove all negative thoughts from your mind. Bring positive goals, thoughts and memories to the forefront of your conscience. Focus on specific areas of discomfort that may require balance and wellness.

Relax and hold the Pendant and Disc until you feel a sense of release from your body. This can be in the form of a sigh, yawn, or overall peaceful sensation. This process may be repeated as many times a day as you wish to assist in bringing energetic balance and wellbeing to your mind-body complex.

These ZeroPoint Global Products are an easy and safe way to bring your body into a state of natural wellness and balance.
